AIR-WOLF

TENDER TEXT

Soap and disinfectant dispenser for 800 ml liquid soap or disinfectant, matt white coated stainless steel housing, RAL 9003, brushed stainless steel push-button, replaceable inner container with pump, filled from the top direct into the dispenser itself or by removing the refill container for filling outside the dispenser, push-button operation, dosage amount approx. 1.3 ml/stroke, with standard lock and fill display, rounded top to prevent objects being put down, pump made of plastic at the lowest point so that potential contamination of the liquid soap can be prevented by regular and complete emptying, four-point mounting, including mounting materials and key, for surface installation

DIMENSIONS

H x W x D 208 x 102 x 124 mm
Weight 1.35 kg

AREAS OF APPLICATION

Designed for universal use, including in public areas that are heavily frequented and at risk of vandalism: airports, stadiums, eventhalls, restaurant and food service industry, universities, nightclubs, communal buildings, shops, chambers, offices, theatres, cinemas, hotels, spas, etc., not suitable for kindergartens and primary schools

MOUNTING TIP

Install soap dispensers directly above the washbasin or shelf space if possible. This way liquid soap that drops from hands does not cause a slipping hazard on the floor.

MAINTENANCE

If heavily soiled, the housing should be cleaned first inside and then outside with a mild soapy water and a damp cloth. We also recommend treating stainless steel dispensers with a stainless steel cleaning agent because that way not only is the surface made visually uniform, a protective film is also applied to prevent resoiling and fingerprints. Although it is not necessary for dispenser maintenance, it is also a good idea to disinfect the operating button or lever of soap dispensers regularly to protect users against the transmission of bacteria.
