AIR-WOLF

TENDER TEXT

Waste bin with 60 litre volume, polished stainless steel, tapered design for easy removal of the waste bag, mounting material included, for wall mounting or freestanding positioning

DIMENSIONS

H x W x D	630 x 440 x 315 mm
Gewicht	2.7 kg

AREAS OF APPLICATION

Universally applicable, also in public, heavily frequented and vandalism-prone areas: airports, train stations, stadiums, event halls, restaurants, schools, kindergartens, universities, discotheques, municipal buildings, hospitals, shops, law firms, offices, theaters, cinemas, hotels, leisure facilities, wellness, etc.

ASSEMBLY TIP

If possible, fit the waste bin under the paper towel dispenser on the direct path between the washbasin and the exit. Long-term tests have shown that an average of 4-5 sheets of paper towels are used per drying. This results in paper waste of around half a liter in volume with each hand drying. For example, if you use a 400 sheets paper towel dispenser, we recommended to use a 40-50 liters waste basket.

OPTIONAL - MATCHING WASTE BAGS

Waste bags made of HDPE, transparent, with side folds, tear and puncture resistant, L x W: 995 x 800 mm, circumference: 1,600 mm
10 rolls of 50 bags in a carton, a total of 500 bags,
Art. 22-418

LDPE waste bags, transparent, with side folds, tear and puncture resistant, L x W: 1,005 x 800 mm, circumference: 1,600 mm
10 rolls of 20 bags in a carton, a total of 250 bags,
Art. 22-442
